Dissertation Title: "Essays on Keynesian Business Cycles"
Chair: Dr. Codrina Rada
University of Michigan, Ann Arbor, MI, USA 2010
MA Economics
Chulalongkorn University, Bangkok, Thailand 2008
BA Economics

INTERESTS Macroeconomics, Development Economics, International Economics, Econometrics,
Mathematics for Economics, History of Economic Thought

WORKING PAPERS A Global Analysis of Income Distribution and Capacity Utilization Interactions: The
Structuralist View (Job Market Paper)
Abstract: The demand and distributive regimes are estimated from 62 countries around the
world based on the Structuralist Goodwin model. The distributive regime appears to be
Marxian/profit-squeeze and the demand exhibits a weekly profit-led regime. The profit-led
demand regime and the profit-squeeze distributive regime are stronger in advanced economies
than in emerging economies. The results are also guaranteed when the slopes are allowed to be
varied across regions. In the long run, the results reveal that the collective wage suppression
would result only in declining wage share, and no positive gain in utilization is found both in
developed and developing countries.
